

NAME OF THE PROBLEM STATEMENT: Help me with my mood

TEAM SIZE: 4 MEMBERS

TEAM MEMBERS : 1. ROSHAN FATHIMA.S

2. PREETHI.T.M

3. PRASHANTHI.A.R

4. VARSHINI.S

PROBLEM STATEMENT: A person's emotions and moods have direct bearings on his/her daily activities. It is necessary to eliminate negative emotions that our family or friends might be experiencing, to help them lead a better life. Hence it becomes important to regularly analyze the social-media health of our friends and family to take timely action. It can be analysed with analytics tool like google analytics to maintain the mental health of a person.

SCOPE OF WORK IN THE OPTED PROBLEM STATEMENT: To create analytics tool to analyse human mood and behaviour which includes their posts, blogs, likes and web surfing. It helps in category the people based on their social behaviour and can even protect people from being pulled into the state of depression.
